### > Introduction

Pain is one of the most common reasons why people seek medical treatment. Experience all over the world show that pain is still not well managed. Many barriers of pain management have been identified and failure of healthcare providers to assess and document pain has been one of the major barriers to relief of pain. Pain management can be improved with education of healthcare providers and well as partners. The Department of Anaesthesiology and Intensive Care, Universiti Kebangsaan Malaysia Medical Center and The Malaysian Association for the Study of Pain have made a conjoint effort to organize this conference to promote better quality in pain management by improving the knowledge and skills of healthcare providers with regards to acute pain management. The theme of this conference is **“Achieving Excellence in Pain relief”**
